

The template below shows the undergraduate curriculum requirements for students majoring in Computer Science, including dual majors. Only use this template if your first semester at RPI was in the F20/S21 academic year. Note that you do not need to take courses in the exact order shown below, as long as all requirements are met and you earn at least 128 credit hours. Check the catalog for prerequisites and semester restrictions (e.g., fall only, spring only) on all courses you plan to take.

**First Year**

<b>Fall 2020</b>		<b>Spring 2021</b>	
CSCI 1100 Computer Science I <sup>1</sup>	4	CSCI 1200 Data Structures	4
MATH 1010 Calculus I	4	MATH 1020 Calculus II	4
PHYS 1100 Physics I <sup>2</sup>	4	BIOL 1010 Intro. to Biology <sup>2</sup>	3
HASS Elective	4	BIOL 1015 Intro. to Biology Lab <sup>2</sup>	1
		HASS Elective	4

**Second Year**

<b>Fall 2021</b>		<b>Spring 2022</b>	
CSCI 2200 Foundations of CS <sup>3</sup>	4	CSCI 2300 Intro. to Algorithms	4
CSCI 2500 Computer Organization <sup>4</sup>	4	CSCI 2600 Principles of Software <sup>5</sup>	4
Mathematics Option I	4	Mathematics Option II	4
HASS Elective	4	HASS Elective	4

**Third Year**

<b>Arch Summer 2022</b>		<b>Fall 2022 -or- Spring 2023</b>	
CSCI 4210 Operating Systems <sup>7</sup>	4	CSCI 4430 Programming Languages <sup>7</sup> -or- CS Option/Capstone	4
CS Option/Capstone -or- Free Elective <sup>6</sup>	4	Science Option	4
HASS Elective	4	HASS Elective	4
Free Elective	4	Free Elective	4

**Fourth Year**

<b>Fall 2023</b>		<b>Spring 2024</b>	
CS Option/Capstone -or- CSCI 4430 Programming Languages <sup>7</sup>	4	CS Option/Capstone	4
CS Option/Capstone	4	Free Elective -or- CS Option/Capstone	4
Free Elective	4	Free Elective	4
Free Elective	4	Free Elective	4

<sup>1</sup> Students with sufficient background in computer science may skip CSCI 1100 and replace it with four credits of other CSCI course(s) at the 2000 level or above.

<sup>2</sup> If no prior experience in MATH 1010, we recommend taking BIOL 1010/BIOL 1015 in fall semester of the first year; otherwise, we recommend taking PHYS 1100 in fall semester of the first year.

<sup>3</sup> Students may not receive credit for both CSCI 2200 and MATH 2800.

<sup>4</sup> Dual majors in Computer Systems Engineering may replace CSCI 2500 with ECSE 2660; students should take only one of these courses.

<sup>5</sup> CSCI 2600 is offered in summer and spring semesters.

<sup>6</sup> Specific course(s) offered will vary each summer.

<sup>7</sup> CSCI 4210 is offered in summer and spring semesters; CSCI 4430 is only offered in fall semesters.

**Science Option:** A four-credit course chosen from the following: astronomy, biology, chemistry, earth and environmental science, and physics. The Pass/No Credit option cannot be used for this course. The course EARTH 1030 cannot be used to satisfy this requirement.

**Mathematics Options:** Two additional courses in mathematics. Mathematics Option I must be one of the following courses: MATH 2010, MATH 4030, MATH 4040, MATH 4100, or MATP 4600. Mathematics Option II must be any course in MATH/MATP at the 2000 level or above (excluding MATH 2800). Independent study courses cannot be used to satisfy this option. The Pass/No Credit option cannot be used for these courses. Note that although some courses are cross-listed as both MATH and CSCI, if a course is used to fulfill the Mathematics Option requirement, it cannot also be used as a CS Option/Capstone course.

**Computer Science (CS) Options:** Four additional computing courses of three or four credits at the 4000 or 6000 level, i.e., courses in the series CSCI 4xxx and CSCI 6xxx. Reading and independent study courses cannot be used for these courses. Further, the Pass/No Credit option cannot be used for these courses. Note that of the required 16 credits, any missing credits due to 3-credit courses may be made up as free elective credits.

**Computer Science Capstone:** A culminating experience selected from one of the two categories below (note that the Pass/No Credit option cannot be used for any of the courses below):

- (1) The research-focused capstone consists of a four-credit Undergraduate Research Project (URP) supervised by a CSCI (or CSCI-affiliated) faculty member. Students must register for these credits (i.e., CSCI 4941) in one of their final two undergraduate semesters (not including co-op). Further, the student is required to have taken a 4000-level course or an earlier 4000-level URP with the faculty supervisor. For the URP, the student must either (a) complete a formal written research project report or paper or (b) write and present a conference-quality presentation/poster approved by the faculty supervisor. If students meet the above requirements, they are also encouraged to consider participating in the Honors Research Thesis Program for Undergraduates.

Students must include the following information in their URP proposals:

- (a) Description of the research project
  - (b) Relevance and significance of the research
  - (c) Milestones and timeline of the research, with contingency plans if milestone(s) are not met
  - (d) Description of the project deliverables (i.e., a written document, program developed, etc.)
- (2) The coursework concentration capstone consists of three 4000- or 6000-level CSCI (or CSCI cross-listed) courses in one of the following topic areas:
    - (a) Theory and Algorithms
    - (b) Systems and Software
    - (c) Artificial Intelligence and Data
    - (d) Vision, Graphics, Robotics, and Games

All 4000- and 6000-level CSCI catalog courses that are not part of the required undergraduate core are assigned to one or more topic areas. Similarly, all 4000- and 6000-level special topics courses (i.e., with 496x, 497x, 696x, and 697x course numbers) are assigned to one or more topic areas when the given course is listed. Note that the courses taken also count as Computer Science (CS) Option courses.
